

INTRALOGISTICS SOLUTIONS

ALSTEF
GROUP

COMPLETE INTRALOGISTICS SOLUTIONS

Alstef Group designs, integrates and maintains turnkey and tailor-made intralogistics systems, perfectly suited to your needs.

For decades, Alstef Group has been designing, manufacturing and installing internal logistics flow management solutions for distribution centers and production sites.

Our mission is to meet all of our customers' flow and storage needs, by developing a system that will provide a complete logistics solution made of technologies adapted to specific customer requirements and responding to their objectives and changes in their activity.

ANALYZE

Analysis of customer needs, processes, data and performance criteria.

DESIGN

Tailor-made solutions to optimize performance.

EXECUTE

Implementation and start-up assistance.

ONGOING SUPPORT

Guarantee your flows over time and support for your evolution.

OUR KNOW-HOW

We utilize our turnkey project know-how to offer a wide range of solutions.

SYSTEM EXPERTISE

Our extensive experience and knowledge of industrial processes are the core of our pre-sales and project management activities: advice, design, simulations, and logistics analysis.

SOFTWARE SUITE

Our software suite, OPAL, optimizes the control of your warehouse by managing all logistics flows, AGV fleets, automated storage and order picking, while adapting to your business requirements.

PRODUCTION, RECEIVING AND SHIPPING FLOWS

AGV, conveyors, shuttles: optimize and control your internal logistics with the automated management of your flows.

AUTOMATED STORAGE

For 60 years, Alstef Group has been offering turnkey automated storage systems based on stacker cranes, AGVs and shuttles, perfectly adapted to our customers' specificities.

MOBILE ROBOTICS | AGVS

Alstef Group designs and manufactures a wide range of AGV/AMR that optimize your logistic performances by moving and storing loads safely in your factories and warehouses.

ORDER PICKING

Alstef Group offers comprehensive solutions for layer or package order picking, with Goods-to-Person or robotic systems.
